~~Aerial and Hand Spray Plan~~*Pre-Harvest Hack + Squirt*

Applicator: Roseburg Resources Company

Unit # 1 Acres 12Unit Name Tail Inlet

Targets: hardwoods, woody brush, herbaceous

Application Rate: 5 - 10 gal/acre. Carrier: water

Chemicals to be used singly or in combination:

Glyphosate

Sulfometuron methyl

Metsulfuron methyl

Imazapyr

Hexazinone

Clopyralid

Atrazine

Triclopyr Ester + Amine

Non-ionic surfactant

Oil surfactant

Other _____

WRITTEN PLAN REQUIRED:

YES (NO)

WRITTEN PLAN

All chemical application rules specified in the Oregon Forest Practices Act will be adhered to. A buffer strip parallel to each fish bearing or domestic stream will be left to protect water from the direct application of chemicals. Protected resources will be reviewed with the applicator prior to application. A Company Forester will be nearby to monitor weather.

Additional Mitigating Measures:

- ☒ For post-harvest applications, all hardwoods left within the Riparian Zone will not be targeted for treatment. For pre-harvest applications, hardwoods within 20' of the waters edge of fish streams will not be treated.

- ☐ The helicopter used for applying herbicides to Roseburg Resources plantations will be equipped with and may implement a unique half boom shutoff system which can limit the swath width to approximately 25 feet, and will more accurately align the swath edge under the center of the helicopter while reducing drift. This system will be implemented in areas where site and environmental conditions (terrain, weather, RMA width, etc.) dictate the need for additional protection measures.

- ☐ Application will comply with all regulations pertaining to seasonal and temporal restrictions around the identified wildlife resource site.

- ☐ No hand application will occur within 10' of the aquatic area of the identified stream.

Re: Written Plan for 2012 operations

Seneca Jones Timber Company herein submits a written plan for operations near a resource protection area. In accordance with the Oregon Forest Practices Act, these operations shall provide equal or better protection for the environment while enhancing effectiveness of forest management operations and achievement of the desired future condition. This written plan is based on the following information:

Type of Operation:	Manual Herbicide Application
Unit:	Fish Creek T16S, R7W, Section 30 3.07 Miles
Reason for Plan:	Operation within 100' of type 'F' class stream

Information:

As seen on the attached map, Fish Creek flows adjacent and parallel to Fish Creek road system. Also a gravel road crosses over Fish Creek. This stream is classed as Large 'F' or fish-bearing stream, in this area. Seneca plans to apply herbicides only in the treatment area shown on the attached map, but no closer than 10 feet. This will allow the buffer to protect the streams from any potential drift or error of application and maintain shade on the watercourse. This release operation will utilize Triclopyr, Glyphosate, Syltac and Surfactant Oil herbicides primarily for control of Scotch Broom and Black Berry.

The protection of these stream zones will be ensured by Seneca's continued dedication to the proper application of herbicides through the following practices. Prior to application a Seneca representative will relay the information included in this written plan to the applicator. This information will include a thorough review of the stream zone and the 10' no spray buffer zone as well as property line locations. Applicator will be instructed to utilize a batching area at least 100 feet from any water area. Prior to and during the application period the applicator will take continuous weather measurements to assess risk and continued plan success. These stream zone protection measures are consistent with best management practices and will not affect any of the required components of the riparian management zone.

In closing we believe these measures will benefit both the environment and the operations of Seneca Jones Timber Company. If there are any concerns or more appropriate measures to be considered, please telephone our office at 541.461-6245. Otherwise, we will anticipate your approval of this measure and proceed as indicated during our operations.

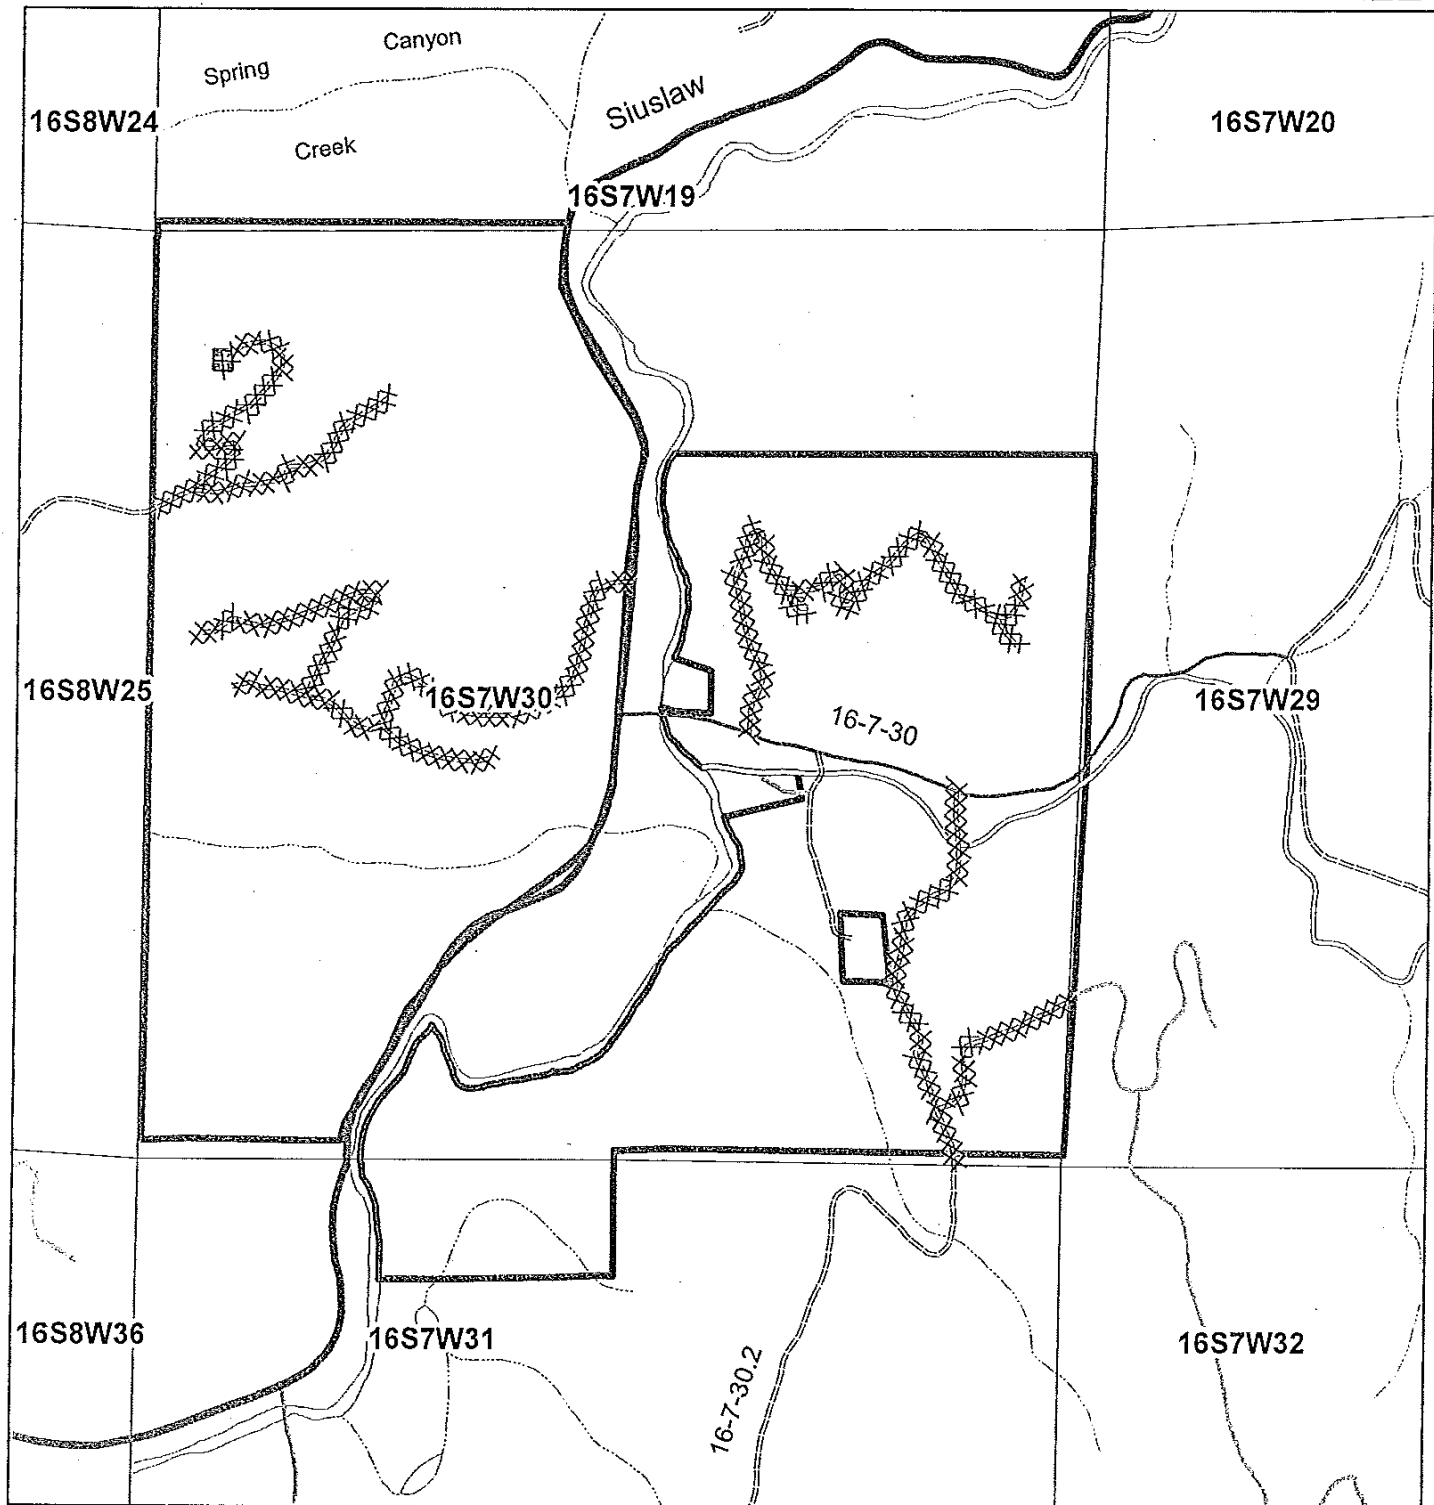

Sincerely,

MIKE L. EMMONS

Mike Emmons

WRITTEN PLAN

Permit # 2012-781-00???

Young 2012-PlantSkydd

T16S-R6W-SECTIONS 3 and 10

Operator: Strata Forestry Inc.
Landowner: WE Young Family Trust c/o W.E. McArthur & Assoc.
Timber Owner: WE Young Family Trust c/o W.E. McArthur & Assoc.
Date: April 27, 2012

Proposed Plan:

The reason for this plan is to protect a small fish-bearing stream, which runs through the northern portion of the treatment unit which has been clear-cut. A riparian management buffer of 50 feet or more has been flagged with red and blue ribbon. No activity will occur in RMA buffer. The purpose of this operation is to protect the new planted seedlings from the voracious appetite of an under fed deer population that lusts after tender young vegetation. PlantSkydd is a 100% organic product that will not affect the stream buffer. All necessary precautions will be taken to provide protection for the RMA.

Submitted by,

Roger Fearn, President

NOTIFICATION OF OPERATION/APPLICATION FOR PERMIT

OREGON DEPARTMENT OF FORESTRY

OREGON DEPARTMENT OF REVENUE

Filing this notification does not grant permission to remove forest products! You must have permission from the landowner and timber owner.

The landowner is responsible for reforestation. Early consultation with the Stewardship Forester is advised.

For activities or operations changing the land to a non-forest use, the applicant is advised to contact the appropriate local government regarding land use regulations which may apply to the future use or development of this site.

On-site inspections may be conducted by Oregon Department of Forestry (ODF) employees to ensure compliance with all the laws and rules governing fire protection and forest practices on private land.

File a new Notification of Operation/Application for Permit form at an ODF office if any of the following conditions apply:

- Your operation area is new.
- You are adding a new activity to the operation.
- You are changing or increasing the area involved in an existing operation.
- It is after February 28, and you are continuing an operation that has been idle since the end of the previous calendar year and you have not informed ODF you intend to continue the operation before now.

ODF must also be informed in writing of any other changes in the information on an existing notification, but completion of a new form may not be required.

Provide PHOTOCOPIES of the completed original notification form and map to the local offices of the Water Resources Department and the Oregon Department of Fish and Wildlife ONLY if you plan to use on-site water to mix pesticides or to control slash burns.

Multiple harvest units may be listed on one notification. BUT, if HARVEST units are separated by a mile or more (in a straight line) or are in different counties, file separate notifications for each unit. An operation can be any combination of forest activities. See OAR 629-605-0140 for a complete list. OAR 629-600-0100 defines "operation," "commercial," and "unit."

The instructions are printed in italics. Please print or type the information on the form.

Do not fill in green boxes.

File notice with the State Forester at least 15 days prior to the date you would like to start operating. A notification is not considered accepted until it is properly filled out, has a map attached, and is received by the appropriate ODF office. Mail, fax, or deliver the form to one of the Oregon Department of Forestry offices that accepts notifications.

LANDOWNER

RC/EG/S Codes

Information about the forest landowner in Recipient Class (RC), Ethnic Group (EG), and Land Ownership Size (S) is needed for annual reports. We ask you to voluntarily enter this information.

RC: (Recipient Class) Check the box that best identifies the landowner:

- ☐ 1. Local Government
☐ 2. State Government
☐ 3. Federal Agency
☐ 4. Individual/Non-Industrial private
☐ 5. Partnership/Corporation/Industrial
☐ 6. Other private (church, nonprofit organization, etc.)

E.G. (Ethnic Group) Check the box that best identifies the landowner (Codes 2-7 apply to recipient class 4 [Individual] only):

- ☐ 1. Does not apply
☐ 2. White
☐ 3. Black
☐ 4. Hispanic
☐ 5. American Indian/Alaskan Native
☐ 6. Asian/Pacific Islander
☐ 7. All other

S: (Land Ownership Size) Check the box that best identifies the total forest ownership of the landowner:

- ☐ 1. Does not apply
☐ 2. 0 - 9 acres
☐ 3. 10 - 99 acres
☐ 4. 100 - 499 acres
☐ 5. 500 - 999 acres
☐ 6. 1,000 - 4,999 acres
☐ 7. 5,000 + acres

(Landowner is responsible for reforestation)

Part 1: Protected Resources

Large, Medium, and Small Fish and Non-Fish streams located on Freres Lands in Western Lane County. Included are tributaries of Lake Creek and Billy Tower Creek, and other creeks or water within the operations area.

Part 2: Operations

The herbicides will be applied using a ground-based, truck-mounted spray rig and limited to the roadside right-of-ways. The streams will be buffered with a ten foot no spray strip along both sides of the water, marked with flagging prior to operations commencing. The herbicides used will include Carlon XRT; LV-6 2,4-D; Accord XRT; MSO and surfactants; all will be applied at label rates per acre. The carrier will be water.

Part 3: Practices:

All label limitations and restrictions will be followed. No chemical mixing or loading will occur within 100 feet of a Type F stream.
